

# Rock, Paper, Scissors Shoot

---

Create a RPS games that takes user input from the command line and plays against the computer.

## Instructions

- Using the terminal, take an input of `r`, `p` or `s` which will stand for rock, paper, and scissors.
- Have the computer randomly pick one of these three choices.
- Compare the user's input to the computer's choice to determine if the user won, lost, or tied.

## Hints

- Make sure to `import random` is at the top of your code.
- Look into this [stackoverflow](#) question for usage.
