

Credit Card Checker

Instructions

- Create a VBA script that will process the credit card purchases, identifying each of the unique brands listed.
- For the *Basic* assignment, create a single pop-up message for each of the Credit Card brands listed by looping through the list.
- For the *Advanced* assignment, tally the total credit card purchases for each Credit Card brand and add it to the summary table.

Notes

- This assignment is extremely similar to the basic version of the homework assignment. So let's buckle down and analyze this!
