

House Of Pies

Instructions

Part 1

- Create an order form that will display a list of pies to the user in the following way:

```
Welcome to the House of Pies! Here are our pies:
```

```
-----  
(1) Pecan, (2) Apple Crisp, (3) Bean, (4) Banoffee, (5) Black Bun, (6)  
Blueberry, (7) Buko, (8) Burek, (9) Tamale, (10) Steak
```

- Then prompt the user to select which pie they'd like to order via number.
- Immediately after, follow the order with **Great! We'll have that <PIE NAME> right out for you.** and then ask if they would like to make another order. If so, repeat the process.
- Once the user is done purchasing pies, print the total number of pies ordered.

Part 2 (Very Challenging!)

- Modify the application once again, this time conclude the user's purchases by listing out the total pie count broken by **each** pie.

```
You purchased:  
0 Pecan  
0 Apple Crisp  
0 Bean  
2 Banoffee  
0 Black Bun  
0 Blueberry  
0 Buko  
0 Burek  
0 Tamale  
1 Steak
```
