Wells Fargo Part I

Instructions

- 1. Extract words before the phrase "_Wells_Fargo" to figure out the state.
- 2. Add the state to the first column of each spreadsheet.
- 3. Convert the headers of each row to simply say the year.
- 4. Convert the numbers to currency values for all cells.
- Hinto
 - First work on getting the correct formatting on one sheet before moving onto creating a loop that formats each sheet within your workbook
 - If you are looking for a useful resource for finding the code to loop through all worksheets in a workbook, check out this link here (https://support.microsoft.com/en-us/help/142126/macro-to-loop-through-all-worksheets-in-a-workbook)
